

Leaf rubbing Learning Activity

A great activity for children to spend time outdoors collecting leaves, then getting a closer look at nature by exploring the detailed surface of a leaf.

What you need:

-  Paper
-  Sunflower leaves
-  Crayons

Step one

Take the children outside to collect some sunflower leaves.

Step two

Place the leaves under a piece paper, then make a print of the leaves by rubbing crayons over the raised leaf surface. Have fun with different colours and different sized leaves.

Don't forget to send us a photo of your creation!
